

SUSTAINABLE
DEVELOPMENT **GOALS**

17 GOALS TO TRANSFORM OUR WORLD

**IMPLEMENTATION OF THE
EGYPT's 2030 SUSTAINABLE DEVELOPMENT GOALS
(SDGs) THROUGH AIET's PROJECTS**

*Alexandria Higher **I**nstitute of **E**ngineering & **T**echnology
(**AIET**)*

Professor Wageeh El-Askary (Vice Dean of AIET)

Professor Wageeh El-Askary (Vice Dean of AIET)

What is Sustainable Development?

**“Development that meets the needs of the present
without compromising the ability of future generations
to meet their own needs”**

In other words, Sustainable Development is the criteria for achieving social and economic progress in ways that will not exhaust the earth's finite resources and not exploit or impoverish one grouping of people for the enrichment of another.

What are the world's 2030 Sustainable Development Goals?

On September 25, 2015, after three years of debate and negotiations, all 193 member-nations of the UN, voted unanimously to adopt these global Sustainable Development Goals (SDG's), stating:

“On behalf of the peoples we serve, we have adopted a historic decision on a comprehensive, far-reaching and people-centered set of universal and transformative goals and targets. We commit ourselves to working tirelessly for the full implementation of this agenda by 2030.”

Declaration of the 2030 Agenda for sustainable Development

Professor Wageeh El-Askary (Vice Dean of AIET)

SUSTAINABLE DEVELOPMENT GOALS

Professor Wageeh El-Askary (Vice Dean of AIET)

How are the SDGs supposed to be implemented?

■“...all member states to develop as soon as practicable, ambitious national responses to the overall implementation of this Agenda. These can...build on existing planning instruments, such as national development and sustainable development strategies, as appropriate.”

■“...the essential role of national parliaments through their enactment of legislation and adoption of budgets and their role in insuring accountability for the effective implementation of our commitments.”

■“...governments and public institutions...work closely on implementation with regional and local authorities, sub-regional institutions, international institutions, academia, philanthropic organizations, volunteer groups and others.”

Professor Wageeh El-Askary (Vice Dean of AIET)

How will the progress or lack of progress be monitored?

A. Voluntary National Reviews at the UN

Each country is encouraged to “...conduct regular and inclusive reviews of progress at the national and sub-national levels, which are country-led and country-driven.” “Regular reviews at the HLPF are to be voluntary, state-led, undertaken by both developed and developing countries, **and involve multiple stakeholders.**”

B. Stakeholders. That's YOU! We, the **people affected most by the need for these Goals must keep our government accountable to the 2030 Sustainable Development Goals !**

To do that, we must organize!

Professor Wageeh El-Askary (Vice Dean of AIET)

What are EGYPT's 2030 SDGs?

The strategic vision of EGYPT focuses on eight main objectives that are meant to be met by 2030:

1- Quality of life:

Egypt's poverty rates have reached all-time high, and recently has declined for the first time in 20 years since 1999 from 32.5% to 29.7%. The country aims to eliminate poverty by 2030.

2- Equality and Inclusion:

The Egyptian constitution placed the social aspect of equality and inclusion as a cornerstone of the National Agenda for sustainable development, as it stipulates, “We write a constitution that achieves equality between us in rights and duties without any discrimination,” and its fourth article states, "Sovereignty is for the people alone, that they exercise and protect it, and they are the source of authority, and they safeguard their national unity, which is based on the principles of equality, justice and equal opportunities for all citizens."

Therefore, the National Agenda seeks to achieve social justice and social integration, and to promote active citizenship and positive participation for all segments of society. The issues of empowerment, equality and social justice are among the core issues that the Egypt's Vision of 2030 focuses on.

Professor Wageeh El-Askary (Vice Dean of AIET)

3- Robust Economy:

Egypt's current fiscal policy seeks to reduce the state budget deficit and public debt. The transformation towards a knowledge-based digital economy, encouraging innovation, research and development, enhancing the role of promising economic sectors, in addition to encouraging medium, small and micro enterprises, which are among the most important factors that lead to raising the degree of economic flexibility, increasing employment opportunities, achieving financial inclusion, and integrating the informal economic sector, leading to sustainable inclusive growth.

4- Knowledge and Innovation:

As the country aims to establish a close relationship between localizing and employing technology and benefiting from it for sustainable inclusive growth and linking it to social aspects by investing in human capital and building scientific and practical capabilities in accordance with the latest educational systems, technical qualification and vocational training, leading to improving the level of educational and training services provided, all in order to improve productivity and positively affect the labor market.

5- Sustainable Environment:

Egypt seeks to preserve both development and the environment together through the rational use of resources in a way that preserves the rights of future generations in a more secure and adequate way. The country aims to achieve this by facing the effects of climate change, enhancing the resilience of ecosystems and the ability to face natural hazards and disasters, increasing reliance on renewable energy and adopting sustainable consumption and production patterns.

6- Governance:

When it comes to governance of the state, Egypt's vision for the future is to establish governance and adherence to laws, rules and procedures under the rule of law and an institutional framework necessary to achieve transparency, accountability and fight corruption.

7- Peace and Security:

The state places security as a top priority in its comprehensive sense at the national and regional levels as an imperative to achieve and maintain sustainable development. This objective includes ensuring the security of food, water and sustainable energy as well as political, economic, social and environmental stability, information security (cyber) while securing Egypt's borders, combating terrorism and organized crime.

A once-stagnating and aging army, Egypt's Armed Forces is under heavy modernization and development in order to face looming regional threats and protect its interests. It also pursued a policy of diversification of weapon sources in order to not be over-reliant on foreign military aid and consequently, external pressure.

As of 2020, Egypt's military ranks among the top 10 strongest worldwide, ranking first in both Africa and the Middle East and had recently been playing a much bigger role as a regional power than it has in the past decades.

Professor Wageeh El-Askary (Vice Dean of AIET)

8- Leading Stature:

Egypt aims to further increase its regional and international presence diplomatically through establishing mutually beneficial country partnerships with various surrounding countries. Egypt also aims to share its economic and technical experience to its neighboring countries in order to assist its peers with the needed instruments for development as well as providing foreign aid if needed. A goal in line with the Sustainable Development Strategy for Africa 2063.

What are the main Engineering Applications that will be considered for Projects (2022-2023) aiming at SDGs?

6

CLEAN WATER AND SANITATION

**Ensure availability and sustainable
management of water and sanitation for all**

7

AFFORDABLE AND CLEAN ENERGY

**Ensure access to affordable, reliable
sustainable and modern energy for all**

9

INDUSTRY, INNOVATION AND INFRASTRUCTURE

**Build resilient infrastructure, promote
inclusive and sustainable industrialization
and foster innovation**

11

SUSTAINABLE CITIES AND COMMUNITIES

**Make cities and human settlements
inclusive, safe, resilient and sustainable**

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

**Ensure sustainable consumption and
production patterns**

13

CLIMATE ACTION

**Take urgent action to combat climate
change and its impacts**

14 LIFE BELOW WATER

**Conserve and sustainably use the oceans, seas and
marine resources for sustainable development**

15 LIFE ON LAND

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

Vision & Mission of AIET

Vision:

The Alexandria Higher Institute of Engineering and Technology, as an educational and research institution, aspires to achieve excellence and leadership in engineering education at all its local, regional, and international levels. This is to keep pace with engineering developments and develop the educational and professional capabilities of its students for community service and environmental development.

Mission:

The Alexandria Higher Institute of Engineering and Technology seeks to prepare distinguished engineers capable of innovation, technological creativity, and competition in the job market by offering distinguished programs in engineering specializations. This keeps pace with scientific and research progress and upgrading professional performance in line with the developments of the times to achieve sustainable development for community service and environmental development.

“We the Egyptian future engineers...”
organize our project to ensure that the
vision and mission of our *Alexandria Higher
Institute of Engineering & Technology (AIET)*
become aligned with the 2030 SDGs –
for the future of EGYPT and of the
world

There is no time to lose.

Professor Wageeh El-Askary (Vice Dean of AIET)

The main goals expected to be achieved from SDGs in the present project

Here are the goals expected to be achieved from the SDGs through the graduation project 2022-2023:

- 1- “....”
- 2- “....”
- 3- “....”
